Cancer Immunotherapy Clinical Trials

The University of Pennsylvania is the data coordinating center for an NIH sponsored canine cancer immunotherapy clinical trials network. There are two study sites who are running fully funded clinical trials for dogs with brain tumors, the Veterinary Schools of the University of Minnesota and the University of Alabama (with additional sites at Auburn, Mississippi and Georgia). These Universities are actively recruiting patients with brain tumors. There is also a study site at Tufts University that has a fully funded trial for dogs with B cell lymphoma. There are also sites for patients with osteosarcoma and melanoma. Nicola J. Mason leads the data coordinating center.

For more information about joining in these cancer immunotherapy clinical trials, please contact:

Nicola J. Mason. Vet Med, PhD, DACVIM
Associate Professor of Medicine
